

Mobile Otp Verification Using Twilio

Step1:

Link: <https://www.twilio.com/>

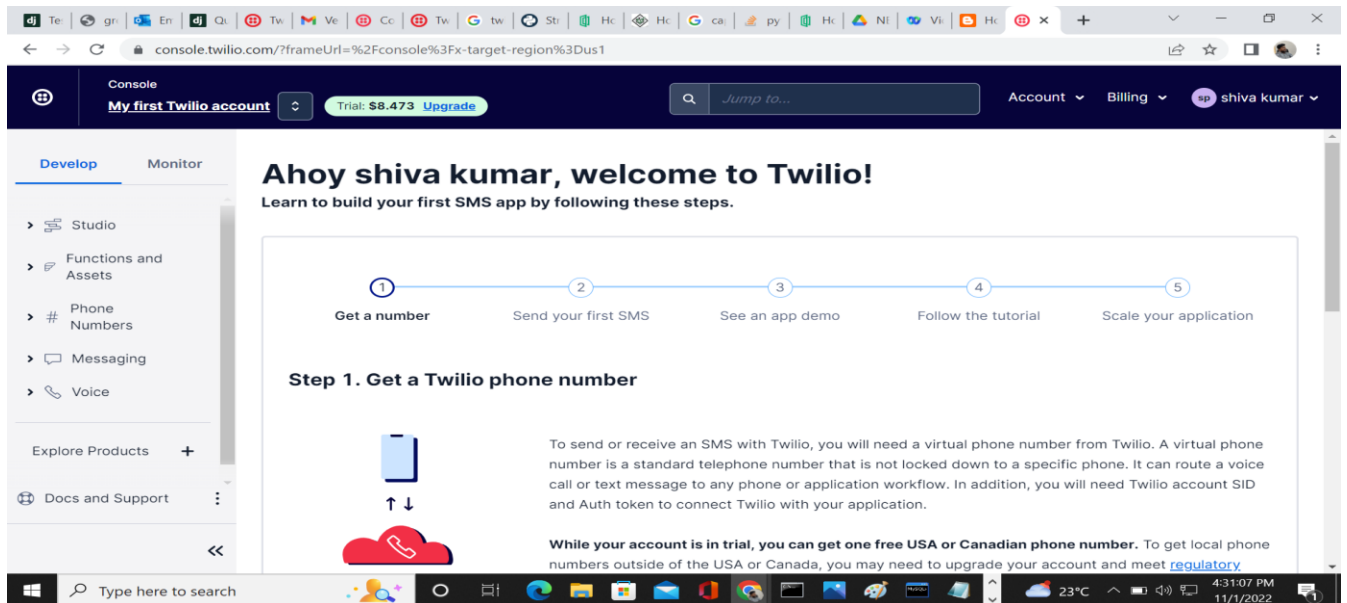

After entering into the twilio we have to signUp and Login with our credentials

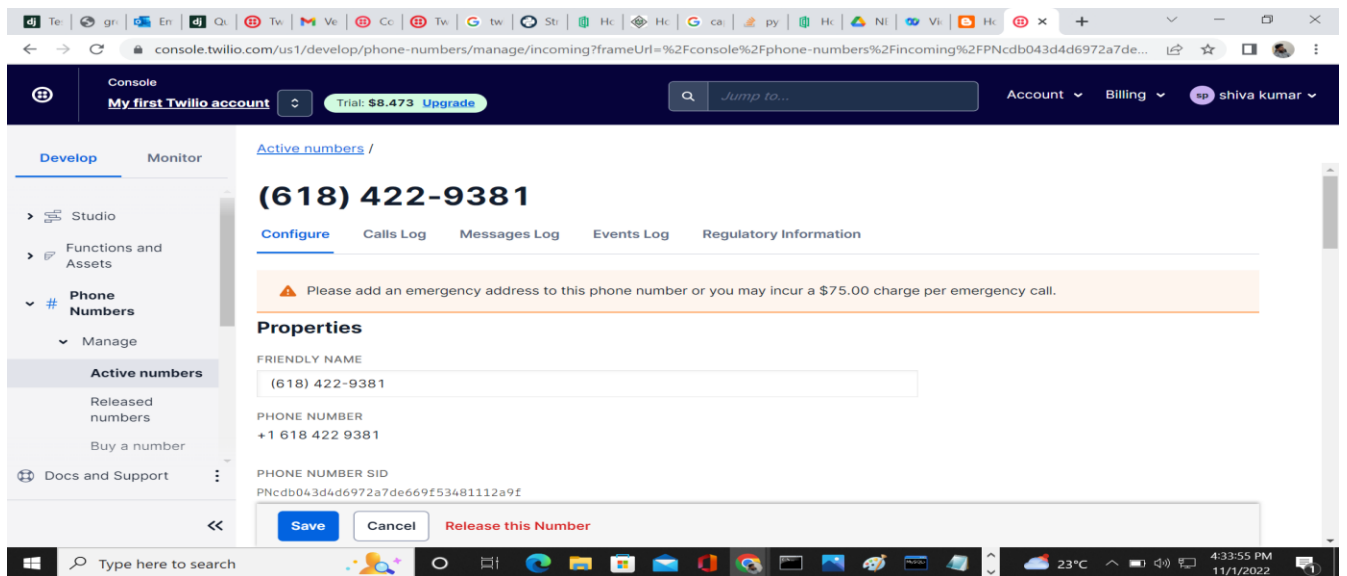

Step2:

Below is the twilio home page

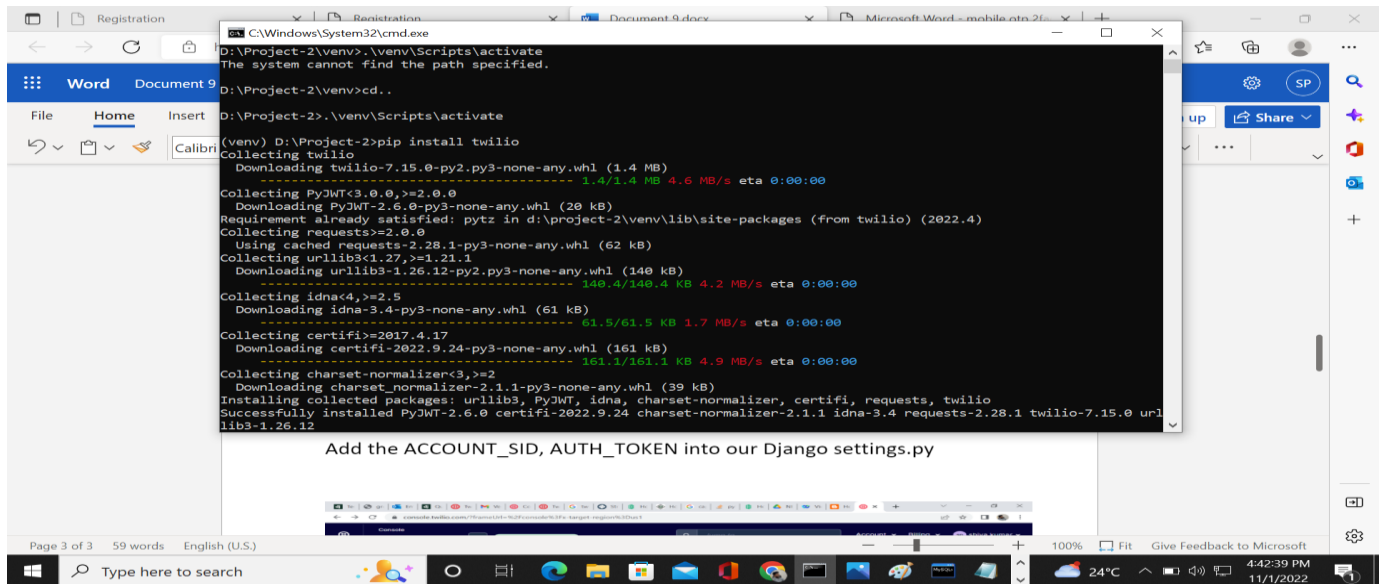

Twilio is providing one mobile number to send the otp

Step3:

Install twilio module into virtual environment.

-->pip install twilio

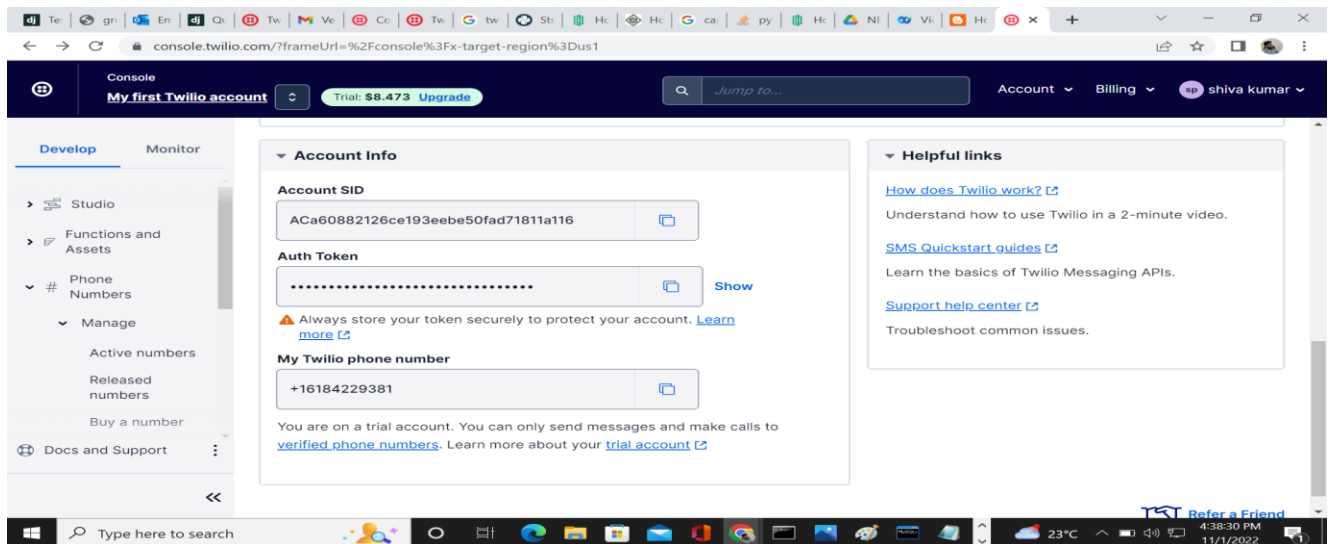

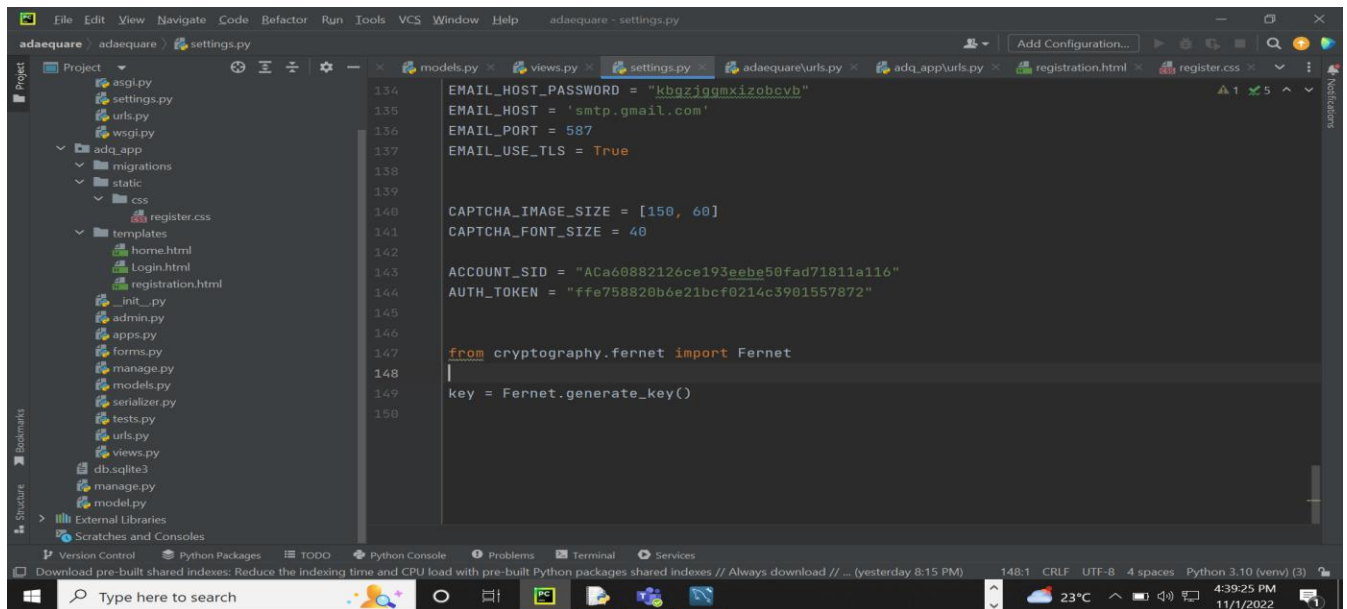

The screenshot shows a Windows desktop environment. In the foreground, a terminal window titled "C:\Windows\System32\cmd.exe" is open. It shows the command prompt at "D:\Project-2\venv>" and the user has entered "cd .." and "D:\Project-2\venv\Scripts\activate". Then, the user has entered "(venv) D:\Project-2>pip install twilio". The terminal output shows the installation progress for twilio-7.15.0-py2.py3-none-any.whl (1.4 MB) and its dependencies: PyJWT, requests, urllib3, idna, and certifi. The installation is successful. In the background, a Microsoft Word document titled "Document 9.docx" is open, showing the "File" and "Home" tabs. The taskbar at the bottom shows the search bar, task view button, and several open applications including Edge, File Explorer, and the terminal.

```
C:\Windows\System32\cmd.exe
D:\Project-2\venv>cd ..
D:\Project-2\venv\Scripts\activate
The system cannot find the path specified.
D:\Project-2\venv>cd ..
D:\Project-2\venv\Scripts\activate
(venv) D:\Project-2>pip install twilio

Add the ACCOUNT_SID, AUTH_TOKEN into our Django settings.py

Add the ACCOUNT_SID, AUTH_TOKEN into our Django settings.py

Step4:

After adding ACCOUNT_SID and AUTH_TOKEN import the twilio client for to send the otp to the username[MOBILE]

-->Using client, we can send the otp to the user entered phone number.

-->In test trail while sending otp we have to verify phone number in twilio like below.

Twilio Console interface showing Verified Caller IDs. The page title is "Verified Caller IDs". A sidebar on the left contains navigation links: Studio, Functions and Assets, Phone Numbers (selected), Manage, Active numbers, Released numbers, Buy a number, Docs and Support. The main content area has a header with "My first Twilio account" and a "Trial: \$13.667 Upgrade" button. Below the header, there's a search bar and a "Jump to..." field. The main content area displays a table of Verified Caller IDs with columns: Number, Friendly Name, and Actions. The table contains four rows of data. A "Filter" button and a "Clear filter" link are located to the right of the search bar.

Number	Friendly Name	Actions
+91 63042 96961	916304296961	Remove
+91 96762 75394	919676275394	Remove
+91 84658 80062	918465880062	Remove
+91 99490 82416	919949082416	Remove

The screenshot displays the Twilio console's pricing page. The left sidebar contains navigation links for Billing, Usage, and Nonprofit benefits. The main content area is titled 'Pricing' and features several service cards: Programmable Voice, Programmable SMS, Phone Numbers, Elastic SIP Trunking, Programmable Chat, Client, and Network Traversal Service. Each card includes a brief description and links to view prices or download CSV files. The top of the console shows the account name 'My first Twilio account', a trial balance of \$8,473, and an upgrade button. The bottom of the console shows the user's name 'shiva kumar' and the current time and date.
